Skills

Languages: C/C++, Java, JavaScript, HTML, CSS

Frontend: HTML, CSS

Backend: Node.js, Express.js

Database: MongoDB

Tools & Platforms: Git, GitHub, Postman, Figma, Vercel, Render

Work Experience

Mamta Travels

Jan 2026 – Present

Web Development

- Designing and developing a business website to improve online presence and customer engagement
- Building responsive UI and optimizing performance for better user experience

Open Source Connect

Jan 2026 – Present

Open-Source Contributor & Campus Head

- Contributed to open-source projects by doing pull requests (PRs) involving bug fixes, feature improvements, and documentation updates.
- Collaborated with maintainers and developers through GitHub discussions, and code reviews.
- Served as Campus Head, promoting open-source culture to the college and schools.

ShadowFox, Chennai

Dec2025–Jan2026

Web Development Intern

- Designed and developed a personal portfolio website showcasing project, technical skills and achievements using web technologies.
- Built an interactive fan page website with responsive UI and modern frameworks and modern animation to improve user engagement.
- Delivered a custom client project, developing a functional website tailored to user requirement.
- JS, HTML, CSS, Git, Git Hub

Project Work

Safe Route – Intelligent Women Safety Navigation (2026) | [GitHub](#) :

- Built a navigation system recommending safer routes based on risk analysis instead of shortest paths
- Integrated voice-triggered emergency alerts with buzzer system
- Developed backend services for handling route data and user input
- Used Node.js, MongoDB, HTML, CSS, Twilio.

Rapid Claim (2025):

- Built an AI-powered system using LLMs + satellite imagery to analyze disaster-affected regions
- Extracted structured insights from unstructured reports to improve claim decision-making
- Integrated fraud detection logic to enhance transparency in insurance processing
- Tech: Node.js, React, MongoDB, APIs.

ClusterNodes (2026) | [GitHub](#)

- ClusterNodes is a high-performance security analysis tool designed to visualize and neutralize multi-hop attack paths within Kubernetes clusters. By modeling cluster infrastructure as a Directed Acyclic Graph (DAG), it surfaces hidden risks that traditional static audits miss.

Education

SRM Institute of Science and Technology

May 2024 – Expected 2028

B.Tech. in Computer Science and Engineering

CGPA: 9.88/10

Relevant Coursework: DSA, DBMS, OS, CN, Machine Learning, Software Engineering

Additional Projects

- **Handwritten Digit & Character Recognition (2025) | [GitHub](#) :**

Built a Convolutional Neural Network (CNN) model trained on the EMNIST dataset to recognize handwritten digits and alphabets from real-world images. Implemented preprocessing technique to improve the predication accuracy. Used Python, HTML, CSS, JavaScript.

- **Route Management System (2025) | [GitHub](#):**

Developed a system to manage transportation route information and pricing for logistics or travel companies. Designed a centralized database where admin can store the route information and price so that the new employee can use that data to tell the customer without repeatedly consulting higher authorities. Used Node.js, MongoDB, HTML, CSS.

Publications & Patents

- **Rapid Claim (Patent Filed, 2026)**

Designed a system that analyzes disaster- affected regions using the satellite imagery and automated document analysis in validating insurance claims. The system extracts structured insights from unstructured reports and generates justification for claim decisions to improve transparency and reduce fraudulent claims.

Status: Under review through SRM Institute of Science and Technology.

- **Rapid Claim: AI-Based Disaster Claim Verification System (Research Paper – Under Preparation, 2025)**

Research work focused on leveraging satellite imagery and Large Language Models to support insurance companies in verifying disaster-related claims and identifying potential fraud through automated analysis.

Status: Paper in preparation / submission

Awards and Certificates

- 1st Prize -IIT Dharwad Hackathon (₹50,000)
- 1st Prize- Frame Forge, Synergy SRM
- AWS Cloud Practitioner Essentials -AWS
- Introduction to AI Concepts - Microsoft
- Python for Data Science - IBM
- Programming in Java -NPTEL
- Web Development Internship -ShadowFox
